Executive, Task, Stool Disassembly

1 Chair Series: Grid, EDU²

Tools Required: Phillips & Flat Head Screwdrivers, Needle Nose Pliers, Staple Puller, Hammer

The base is press fitted to the cylinder. The receiving hole of the base is tappered. Turn the chair over and firmly hold a base leg in one hand using upward pressure away from cylinder. Using the steel hammer with the other hand, Strike firmly on the bottom edge of the cylinder. The base will then release from the cylinder. This may take a few strikes with the steel hammer.

The cylinder is press fitted to the mechanism. The receiving hole of the mechanism is tappered. With the chair still in a flipped position, firmly hold cylinder in one hand using upward pressure away from the mechanism.

Using the steel hammer with the other hand, Strike firmly on the mechanism.

The cylinder will then release from the mechanism. This may take a few strikes with the steel hammer.

A Remove the foot ring if applicable. Turn the foot ring until it is loose enough to slide away from the cylinder.

5 The mechanism is mounted to the seat with 4 screws. Using the phillips head screwdriver, remove the 4 screws.
