

Q23 - Basic Synchro

Mechanism Instructions

1 Tension Adjustment:

Turn the knob (under mechanism, not shown in photo) counter clockwise to increase the tension for more resistance, turn knob clockwise to decrease the tension for less resistance.

② Tilt Lock Adjusment:

To engage upright tilt lock, push lever away from the mechanism. To disengage, push the lever toward the mechanism.

③ Pneumatic Lift Adjustment:

Lift lever towards seat to activate height adjustment.

④ Back Depth Adjustment:

The back is attached with a nut. Lossen nut to slide backrest rearward or forward to desired depth. Tighten nut.

All adjustments are made while seated.
